INSTALLATION & OPERATION MANUAL 10088 REV 2 (10/22)

INSTALLATION

UNPACKING

IMMEDIATELY INSPECT FOR SHIPPING DAMAGE

Immediately after unpacking, check for possible shipping damage. If the tilting braising pan is found to be damaged, save the packaging material and contact the carrier within 15 days of delivery.

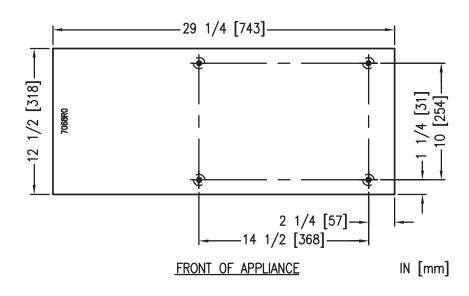

Before installing, verify that the electrical service agrees with the specifications on the rating plate located on the left side panel as you face the front of the braising pan. If the supply and equipment requirements do not agree, contact your dealer or Crown Food Service Equipment Ltd.

ELECTRICAL GROUNDING INSTRUCTIONS

Units equipped with a three-prong (grounding) plug for your protection against shock hazard and should be plugged directly into a properly grounded three-prong receptacle. Do not cut or remove the grounding prong from this plug. (120 volt units only).

INSTALLATION INSTRUCTIONS

- 1. Position appliance on counter allowing sufficient rear clearance from wall to tilt freely and completely without obstruction.
- 2. Mark four corner locations of appliance base, as shown below.
- 3. Remove appliance from counter and locate position of four holes as per drawing below. Drill four 7/16" diameter holes.
- 4. Apply a continuous bead of Silastic or other equivalent sealant along the complete perimeter edge of the appliance base.
- Use 5/16-18 Hex Cap Screws with suitable flat washer to bolt down. Screw length must be 1-1/4 long plus counter top thickness.
- 6. Wipe off excess sealant.
- 7. A Control Box with power supply equivalent to Electrical Rating of appliance should be located conveniently nearby.
- 8. A waterproof electrical connection for power supply to console housing must be provided.
- 9. Ground appliance to terminal provided inside console housing.
- 10. Turn power ON and check for proper operation.

OPERATION

OPERATING INSTRUCTIONS

- 1. Insure that unit has been electrically connected and that circuit breakers are on.
- 2. Place power switch in "ON" position.
- 3. Set the thermostat dial to high (#10).
- 4. Preheat the unit and allow it to cycle thus equalizing heat across the entire surface.
- 5. Cooking should be done at varius temperature settings on the dial as determined by the user.
- 6. Water will boil faster with the use of the optional cover.
- 7. At end of cooking, return thermostat to "OFF" position, turn power switch "OFF" and remove food. Put a small amount of water in the pan and allow to soak for ease of cleaning.

THERMOSTAT SETTINGS

COOKING METHOD	Settings	Temperature
Simmering	1 - 4	(200 °F)
Sautéing	5 - 6	(225 - 275 °F)
Searing	7 - 8	(300 - 350 °F)
Pan Frying	8 - 9	(325 - 375 °F)
Grilling	9 - 10	(350 - 425 °F)

When tilting pan to remove contents take care not to tilt too far too fast as contents are hot and may splash on the operator causing injury.

CLEANING

Disconnect the power supply to the appliance before cleaning or servicing.

The appliance and its parts are hot. Use care when operating, cleaning and servicing the kettle.

Do not use cleaning agents that are corrosive.

Use of cleaning agents that contain, chloride, acids, salts or other corrosive substances may cause pitting and corrosion when used over a period of time. This will reduce the life of the appliance.

Should pitting or corrosion occur this is not covered by warranty.

Follow the recommended cleaning instructions: Use a mild detergent, warm water and rinse thoroughly.

Do not get water in electrical components.

CLEANING INSTRUCTIONS

- 1. The Electric Counter Tilting Skillet should be cleaned after each use.
- 2. Soak cooking surface with water and a mild soap to remove any food stuck to surface.
- 3. Wash entire unit surface with mild detergent and water.
- 4. Rinse entire unit and dry.

All accessories such as cover should also be cleaned as instructed above.

TROUBLESHOOTING

UNIT WILL NOT OPERATE

- 1. Power supply not "ON".
- 2. Defective thermostat or elements

HOT SPOT ON PAN BOTTOM

1. Element not operating. Check for defective element or wire termination.

PAN DIFFICULT TO TILT

- 1. Tilt knob not disengaged.
- 2. Dirt in oilite bearings causing them to bind.
