

# Delta<sup>®</sup> HT-E-SEER

## HIGH TEMPERATURE SANITIZING GLASSWASHER

- High temperature glasswasher
  - No chemical residue
  - Effectively removes lipstick from glassware
- Steam elimination
- Energy Recovery System collects the hot water vapor inside the machine and uses it to preheat the incoming rinse water
- Operates on a single cold water connection
- Recirculating wash design with fresh water rinse
- Push button start with auto-fill
- Three selectable timed cycles for warewashing flexibility and performance
- Delime cycle
- Built-in booster heater with Sani-Sure<sup>™</sup> final rinse system ensures proper rinse temperature
- Digital LED control panel with service diagnostics
- Automatic pumped drain for both floor and wall drain installations
- Built-in chemical pumps and priming switches
- Double-wall cabinet for quiet operation and reduced heat loss
- Powerful 1hp stainless steel wash pump
- Soft Start helps protect glassware from chipping and breaking
- Door interlock comes standard

## Delta® HT-E-SEER

The Delta HT-E-SEER uses hot water to wash and sanitize glassware. The result is exceptional cleaning performance that effectively removes lipstick from glassware. Unlike chemical sanitizing glasswashers that rely on a chlorine sanitizer, the Delta-HT-E-SEER sanitizes with 180 °F rinse water so there is no chemical residue left on the glassware. Best of all, the Steam Elimination and Energy Recovery System (SEER) allows for installation at the bar. SEER collects the hot water vapor generated during the wash and rinse cycles and uses it to preheat the incoming rinse water. This allows the machine to operate from a cold water supply only, saving energy and reducing steam to improve the operator's experience.

The Delta HT-E-SEER is available in two sizes. The Tall/Freestanding model with stainless steel legs provides a 14" clearance beneath the machine. This feature allows for storage of one-gallon size containers of detergent and rinse aid saving valuable space. The Short/Underbar model can be installed beneath the bar and has stainless steel legs that provide a 6" clearance to facilitate cleaning beneath the machine. Both models have stainless steel dress panels on all sides to create an aesthetically pleasing look on a hard-working glasswasher. Delta HT-E-SEER also includes a Soft Start feature that protects glassware from chipping and breaking by reducing the initial pressure from the wash pump at the beginning of the cycle. The Delta HT-E-SEER is the glasswasher for operators who know that crystal-clean glassware is the first priority in delivering an exceptional drink experience.
