

Speedy Chicken

EXPAND YOUR COOKING HORIZONS

UP TO 96 CHICKENS IN JUST 35 MINUTES *

Baking tray specific to poultry cooking in general. In aluminium alloy with a triple-layer, non-stick coating. The special cones where the products are inserted generate convective heat transfer, speeding up the rate of heat exchange during cooking. Thanks to this innovative system, the product is cooked both on the outside and inside in rapid time.

IDEAL FOR:

- Chicken, cockerel, duck in different sizes and quantities.
- Obtaining soft and succulent cooked breast, with browned, crispy skin.
- Maintaining the product whole, without it sticking to the tray during removal thanks to the non-stick coating

ADVANTAGES:

Up to 18% more product as compared to chicken grills, due to reduced weight loss.

Energy consumption: up to 20% less thanks to faster cooking as compared to classic chicken grills.

Cooking time: up to 35% faster as compared to classic chicken grills.

Washing and cleaning times and costs reduced to a minimum. Non-stick coating prevents the accumulation of residue, and thanks to the reduced weight loss the oven stays cleaner.

SPEEDY CHICKEN
Mod. PS1108

PERFECTLY PAIRED WITH POLLOGRILL KIT

Practical, fast and safe system for the collection of cooking fats, with the possibility for retrofitting.

Zero cleaning time. Choose the most suitable cleaning cycle and leave the device to clean itself.

A practical storage bin that doesn't need to be transferred or handled, allowing direct delivery for the recovery of used oil.

No operator supervision is needed during cooking, leaving the operator free to prepare the next batches.

Zero risk of clogged pipes caused by the solidification of fats, requiring costly technical interventions.

Maximum quality, repeatable and constant cooking over time thanks to the automatic ICS cooking system.

Kit composition:

- Steel bowl for oil recovery, complete with valve.
- Rubber extension for tap.
- Plastic oil collection can, 50 litre capacity.
- Grease filter.
