

## Custom Wine Rack Systems *from* Lockwood

*Wine storage that is strong, easy to set up and designed to maximize the space available.*

# Custom Aluminum Wine Rack Systems

## *Sturdy, Lightweight, Space Saving Design*

- All aluminum construction that does not rust
- Standard models hold 12 bottles per shelf, 2 deep x 6 across
- Takes up less than 4 sq. feet of floor space
- Standard shelves on 5 1/2" centers
- Shelves are extruded tube and flat stock, fully welded
- Uprights are a heavy-duty 1/8" thick 1-1/4" x 1-1/4" angle
- Shelves bolt to uprights
- Ships knocked down via UPS / FedEx. Larger orders ship via truckline
- Custom sizes in width, height and capacity

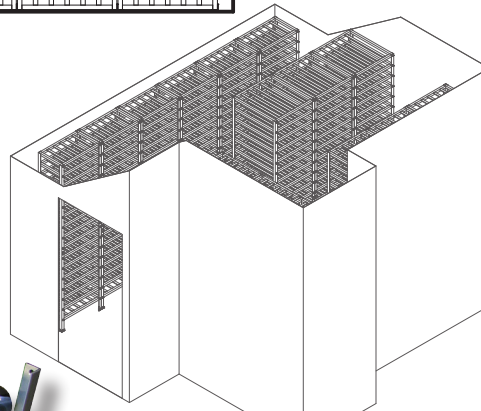

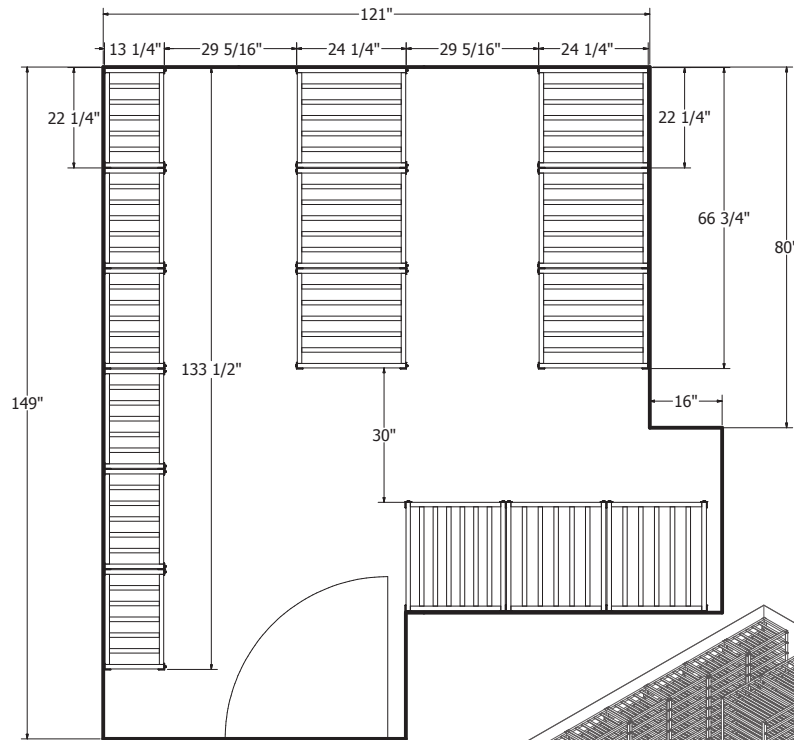

**Custom Design and Layout Available**

Rack storage up to 16' high and virtually any width or depth are no problem with Lockwood Custom Wine Rack Systems.

Keep your wine organized by writing bin numbers directly on rack with a dry erase marker. Easily removable with towel to reassign number.

# Experienced Design Services to Maximize Space

***Lockwood provides complete room layout services.***

We can provide you a CAD drawing of your room showing rack sizes and dimensioning. We can also provide an ISO-layout showing your space in 3D form.

**LABEL VIEW**

**SOLID SHELF**

**MAXIMUM CAPACITY**

## Additional Photos

- Custom shelf sizes and uprights available
- Collaborate with structural engineers on designs to accommodate for seismic areas.

Custom 192" uprights with label view configuration make this two story glass enclosed wine room a spectacular focal point of the establishment. (photo to left)
