Olympic Gray-Guard™ Epoxy

2 LAYERS OF RUST PROTECTION

1

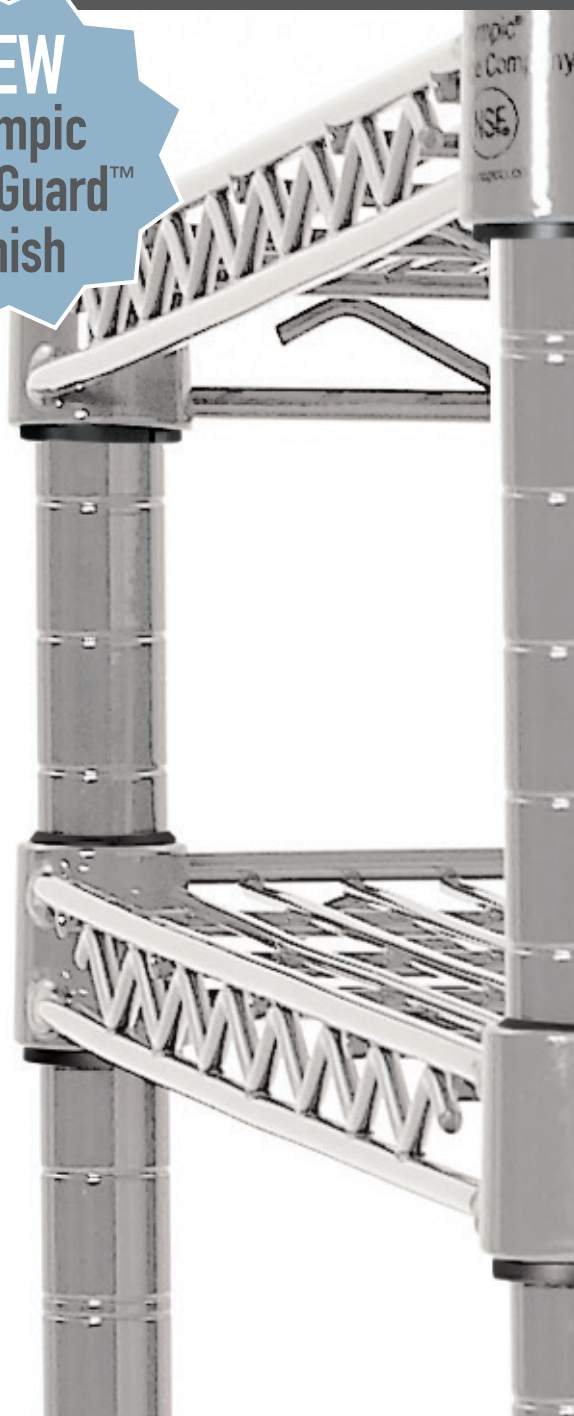

Zinc Chromate
Protected Steel

2

Gray or Green-Guard
Epoxy Coating

ALL Environments

SUPERIOR RUST PROTECTION.

Not all NSF Listed epoxy coated products are the same.

A shelf with an inferior substrate or no substrate under the epoxy coating will rust more quickly. Most cheap imitators do not withstand harsh, wet environments the same as Olympic Green or Gray-Guard epoxy coatings. Olympics coatings are guaranteed for 10 years against rust.

TOUGH & VERSATILE.

HOLD UP TO 600 LBS. PER SHELF

Heavy-gauge open wire design provides the strength and durability you need. Each shelf holds up to 600lbs (272kg).

Stationary Applications

Adjustable leveling foot plates for greater stability.

Moble Applications

Accepts standard stem casters. Perfect for standard duty transport and movable storage applications.

EASY, NO TOOL ASSEMBLY.

EASY TO POSITION SHELVES

Posts have circular grooves at 1" (25mm) increments and numbered at 2" (50mm) increments. Posts are double-grooved every 8" (203mm) for easy identification.

Split Sleeve

Just snap split sleeves together around each post and slide shelf down over split sleeves to lock them in place.
