

OTHER INFORMATION

INSTALLATION SPECIFICATIONS

Installation phases require 4 - 6 hours.

A pizza/baking specialist will set the oven for your production needs (on request).

All oven parts can fit through a standard 36" x 80" door.

All electrical and ventilation hook-ups are at the customer's responsibility and expense.

This work must be carried out by the proper trade professionals and in accordance to local rules and regulations.

As for ventilation requirements, a specialist is required. A certified electrician is required on site during installation phases.

ELECTRICAL REQUIREMENTS

Voltage	208 V
Phase	3
Frequency	60 Hz
Current Draw	55 A
Supply	19, 600 kW
Breakers	65 A

- The plug, cable and receptacle are not included.
- The oven's connections must be made by an electrician on the installation day.
