

DCCOG2 Double-Deck Convection Oven

Installation Instruction Guide

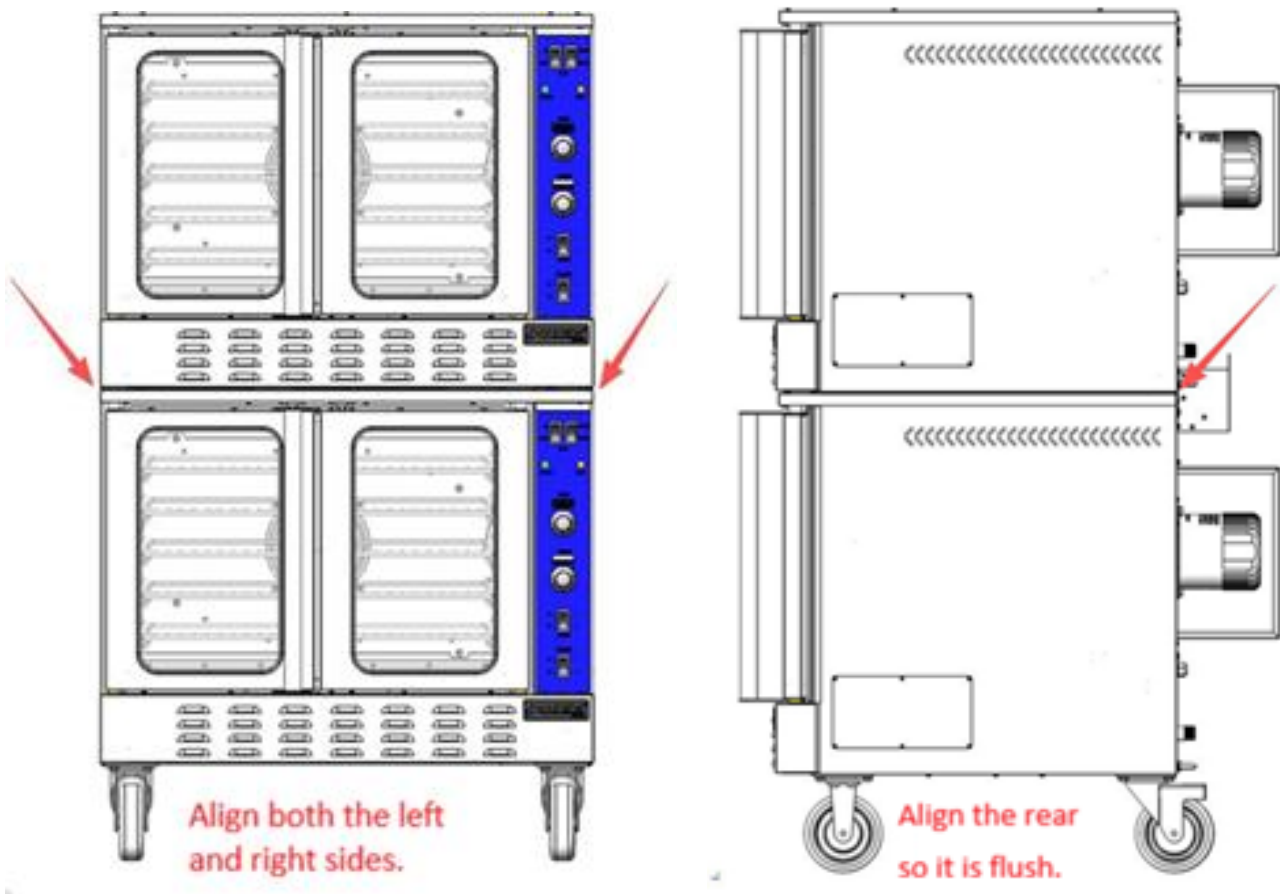

1. Install the casters: Attach the four 5-inch casters to the bottom of the first deck (using M8 screws), as shown in the figure below.

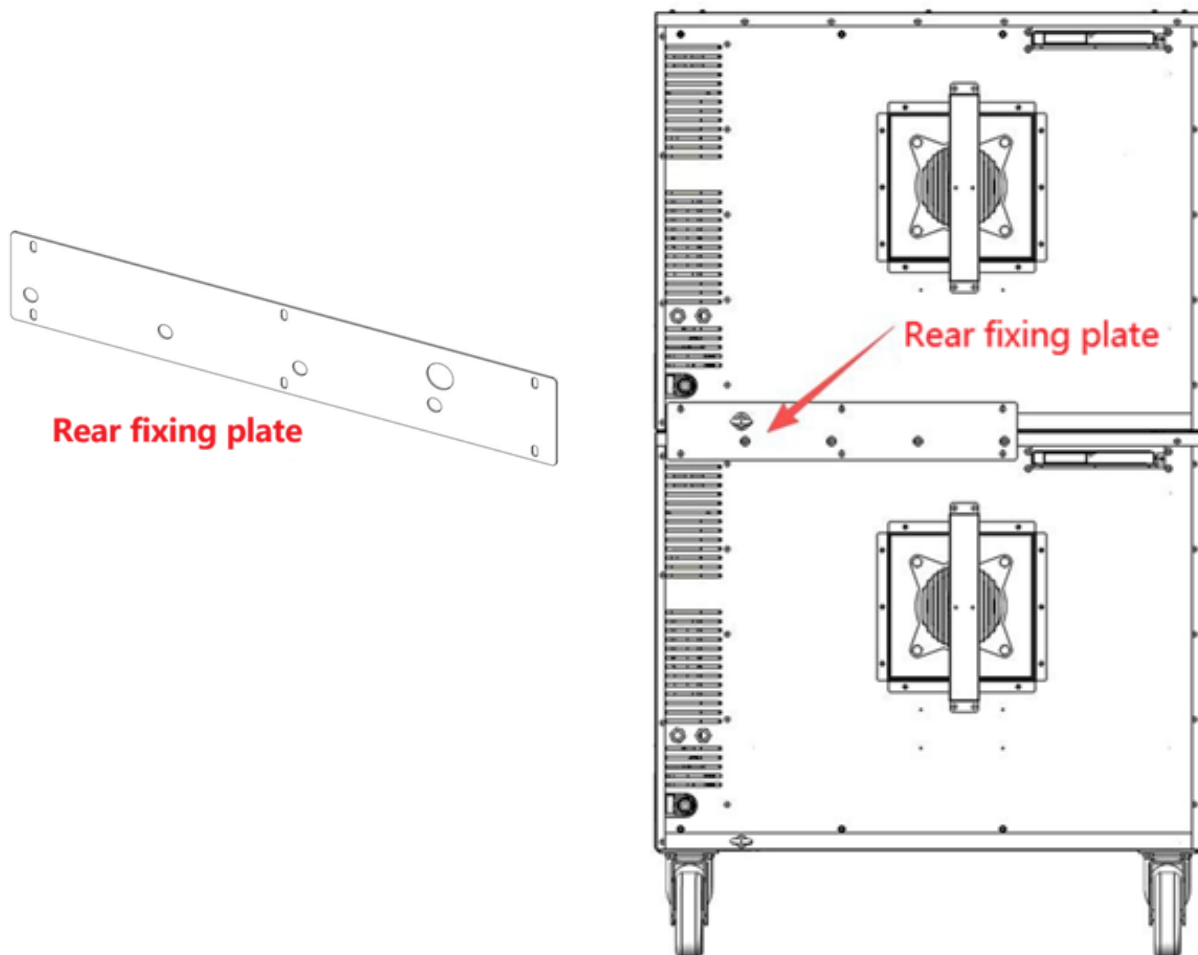

2. Install the upper spacer plates: Install one spacer plate on each of the left and right sides at the top of the first deck, and secure them with M5 screws, as shown in the figure below.

3. Stack the two single-deck convection ovens: Place the second single-deck oven on top of the first deck. Align the left, right, and rear sides so they are flush, as shown in the figure below.

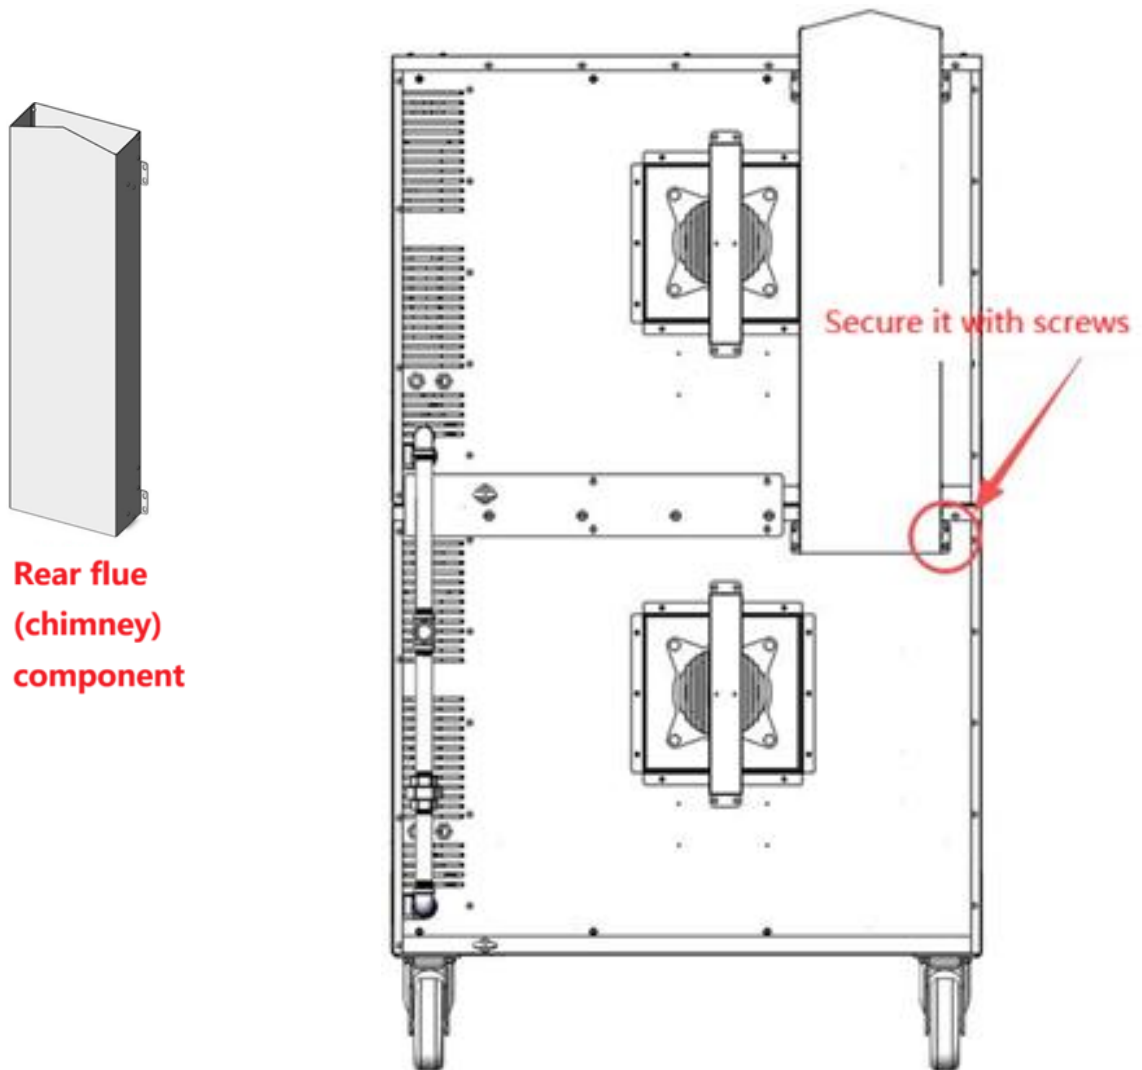

4. Install the rear fixing plate: After the two decks are stacked, install a rear fixing plate at the back and secure it with M5 screws, as shown in the figure below.

5. Install the rear flue (chimney) component:

Install the rear flue component between the two decks. Secure it with four screws on the top and four screws on the bottom, as shown in the figure below.

6. Install the gas inlet connection pipe assembly: Refer to the installation video for step-by-step instructions.
